

Structured Water Created By Clayton

Garden Unit

GARDEN	Stainless Steel Housing, Flow form Polypropylene, food-grade plastic. Comes with Brass Hose Connectors.
SPECS:	Small: 2.5 inches/6.35 cm (L) x 3 inches/7.6 cm (Diam) Wt. 2.0 pounds Medium: 3.6 inches/9.1 cm (L) x 3 inches/7.6 cm (Diam) Wt. 2.4 lbs. Large: 6.9 inches / 17.5cm (L) X 3 inches / 7.6 cm (Diam.) Wt. 3.2 lbs.

Product Description

The Garden Unit is a wonderful Structuring Device designed to install quickly to either the outdoor faucet or the end of a garden hose. This unit produces energized Structured Water that helps grow awesome plants. The plants show an increase in Brix levels and about 30%, less water is needed.

Can Be Used For your RV or Camper, connect to your white hose and enjoy showering, cooking, and drinking. Structured Water while on the road.

Please leave on the white plumbing tape for leak-proof operation, and apply more if needed.

Garden Universal

The unit can be used on any system that has water lines sized .5 inch and under; such as between the garden hose bib and hose, hot tub circulating system, RV water system, aquarium/fish tank, refrigerator water dispenser and ice maker, water fountain, irrigation lines and bus holding tanks.

The Benefits Of Farming With Structured Water

1. Plants thrive with structured water.
2. A higher percent of seeds sprout.
3. Plants mature quicker.
4. Leaves and fruit are larger.
5. Flowers produce more blossoms with brighter colors.
6. In my experiments, yields increased by 20% to 30%.
7. In tests on strawberries and Corn, Brix increased by 25%.
8. Plants need less water.

Carefree Ease of Use

How Structured Water Benefits You

- Water that's alive and full of energy
- Increased oxygen• Super hydration
- Increased absorption of nutrients
- The negative memory in the water wiped clean
- Greater sense of well-being
- Healthier skin and hair
- Eliminates itchy skin
- Reduces hard mineral build-up

How Structured Water Benefits Animals

- Healthier, happier animals with less stress
- Lowered rates of mortality with livestock
- Up to 30% reduction of water needed
- Increased nutrient absorption
- Less infections and disease
- Improve Immune Systems

How Structured Water Benefits Agriculture

Healthier plants with 20-40% increased biomass, Increased Brix levels (more nutrients & sugars), Pest resistant due to plant health, Up to a 30% reduction of water needed for watering due to super hydration.

Increase Agricultural yield with Structured Water.

Water that is structured via the use of a Clayton's Garden Unit reaches crops in a state of lowered surface tension making it readily absorbable.

Efficient absorption means that a smaller volume of water is required to hydrate plants, saving you money. Independent tests have confirmed that crop yield on non-GMO plants is significantly greater (up to 30%).

Structuring water changes its state energetically.

Quantum Energetics and the Field Effect

There are other curious effects of structured water

For example, early in the observation of strawberry field growth, it was noted that structured water had the ability to increase strawberry plant growth even though neighboring plants received no water. Was there some message that structured water gave to the other "dry" plants, off of the plants that were being watered? These are intriguing questions to be observed and answered with further study.

The life force energy of Structured Water.

This improved energetic state makes it difficult for free radicals and chemicals to bond with the water on a molecular level. Pollutants are eliminated on an energetic level.
